# You've Been Breached: Now What?
1 Stop The Bleeding

Assemble a breach response team

Check your network segmentation

Update credentials and passwords of users

2 Gauge Your Legal Exposure

Verify the types of information compromised

Health information requires additional considerations

3 Notify, Notify, Notify

Consult with law enforcement

Designate a person for releasing information

Consider offering free credit monitoring

4 Learn From Your Mistakes

Review your information systems

Enroll in a Dark Web Monitoring service
